HOUSE BILL 2045

Effective December 31, 2013, in accordance with the Arizona House Bill 2045 which requires healthcare providers who are owners or employees of a legal entity with three or more licensed healthcare providers to post their direct pay prices for their 25 most commonly provided services online or make them available upon request. The bill specifies how services are to be identified, how often the list is to be updated and the timeframe from which the list is to be determined.

HB 2045 also requires healthcare providers to obtain a person's signature on a notice before accepting direct payment from that person if the healthcare provider is contracted as a network provider for a healthcare system in which the person is an enrollee. For more information about House Bill 2045, please visit the website of the Arizona State Legislature, azleg.gov. You may search for the bill using their Bill Number Search. All patients or their guardians must read and acknowledge the following guidelines.

MEMBER DIRECT PAYMENT NOTIFICATION – PROVIDER

Arizona state constitution permits you to pay a healthcare provider directly for health care services. Before you make any agreement to do so, please read the following important information.

If you have active health insurance coverage and your healthcare provider is contracting with your health insurance provider, the following guidelines apply:

1. You may not be required to pay the healthcare provider directly for the services covered by your health insurance plan, except for the cost-share amounts that you are obligated to pay under your plan; such as co-payments, co-insurance, and deductible amounts.
2. Your healthcare provider's agreement with your health insurance plan may prevent the healthcare provider from billing you for the difference between the healthcare providers billed charges and the amount allowed by your health insurance plan for covered services.
3. If you pay directly for health care service(s), your healthcare provider is not responsible for submitting claim documentation to your health insurance plan. Before paying your claims, your health insurance plan may require you to provide information and submit documentation necessary to determine whether the services are covered under your health insurance plan.
4. If you do not pay directly for health care service(s), your healthcare provider may be responsible for submitting claim documentation to your health insurance plan for the health care service(s).

Dry Needling Patient Consent to Treat

What is Dry Needling?

Dry needling is a form of therapy in which fine needles are inserted into myofascial trigger points (painful knots in muscles), tendons, ligaments, or near nerves in order to stimulate a healing response in painful musculoskeletal conditions. Dry needling is not acupuncture or Oriental Medicine; that is, it does not have the purpose of altering the flow of energy ("Qi") along traditional intervention for the treatment of pain and dysfunction in musculoskeletal conditions such as neck pain, shoulder impingement, tennis elbow, carpal tunnel syndrome, headaches, knee pain, shin splints, plantar fasciitis, or low-back pain.

Is Dry Needling safe?

Drowsiness, tiredness or dizziness occurs after treatment in a small number of patients (1-3%) and if affected, you are advised not to drive. Minor bleeding or bruising occurs after dry needling in 15-20% of treatments and is considered normal. Temporary pain during dry needling occurs in 60-70% of treatments. Existing symptoms can get worse after treatment (less than 3% of patients); however, this is not necessarily a "bad" sign. Fainting can occur in certain patients (0.3%), particularly at the first treatment session when needling the head or neck regions.

Dry needling is very safe.

However, serious side effects can occur in less than 1 per 10,000 (less than 0.01%) treatments. The most common serious side effect from dry needling-induced pneumothorax (lung collapse due to air inside the chest wall). The symptoms of dry needling-induced pneumothorax commonly do not occur until after the treatment session, sometimes taking several hours to develop. The signs and symptoms of a pneumothorax may include shortness of breath on exertion, increased breathing rate, chest pain, a dry cough, bluish discoloration of the skin, or excessive sweating. If such signs and/or symptoms occur, you should immediately contact your physical therapist or physician. Nerves or blood vessels may be damaged from dry needling which can result in pain, numbness or tingling; however, this is a very rare event and is usually temporary. Damage to internal organs has been reported in the medical literature following needling; however, these are extremely rare events (1 in 200,000).

Is there anything your practitioner needs to know?

1. Have you ever fainted or experienced a seizure? YES/NO
2. Do you have a pacemaker or any electrical implant? YES/NO
3. Are you currently taking anticoagulants (blood thinners e.g. aspirin, warfarin, coumadin)? YES/NO
4. Are you currently taking antibiotics for an infection? YES/NO
5. Do you have a damaged heart valve, metal prosthesis or other risk of infection? YES/NO
6. Are you pregnant or actively trying for a pregnancy? YES/NO
7. Do you suffer from metal allergies? YES/NO
8. Are you diabetic or do you suffer from impaired wound healing? YES/NO
9. Do you have hepatitis B, hepatitis C, HIV, or any other infectious disease? YES/NO
10. Have you eaten in the last 2 hours? YES/NO

Single Use, disposable needles are used in this clinic.
